

~~M~~ (like)

TANTAMOUNT  $M=M$   $M$  (M mountain)

to be tantamount means to have a vague approximate equality

○ swollen. this is perfect for "swollen," but is already "strong" (○ ) How to differentiate the two?

1/2 lines. could be ≡ or |||| or |||

$\frac{1}{2}$  lines in the mind — a possible good title.

Ⓛ habit do re, again L<sup>x</sup> have thing  
the "have" element in "habit" is for the sound

+ etymology → the word is from Latin habere - have

Ids have me thinking much more in terms of symmetry. Antihabit (L<sup>Ⓛ</sup>) seems like a useful + true idea to me. We are sometimes in the habit of not

doing things.

I'll have to make a post on graphic opposites, a fruitlike result of Ids.
