

Wake up and live

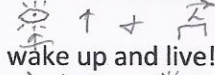

You gotta wake up to a world that's real

you gotta raise up and make you feel

life in full measure is more than just a pleasure

wake up and live!

You got to wake up and begin to feel

you only have one life to live

you only keep that which you give

don't let life have you asleep

you gotta wake up to the world we love

you gotta get with the one above

I can past ... may ... possible
