

~~A~~ acute here I consider --- to be a time-line,
which I like to do because \perp , my time indicator,
does not fully satisfy me. ~~⊙~~ I don't really like
~~⊙~~ for now, preferring ~~⊙~~ with --- the timeline
+ ~~⊙~~ a point circled on it or maybe "I" moving along it.
I also like to use --- as a distance indicator,
replacing the awkward $\triangleleft \text{---} \text{near} \text{---} \text{far}$
(\perp neighbor - a near person, ---^{\perp} the graphic opposite,
for which there is no English word)

① ~~⊙~~ chronic [*chronos, time*] (I often don't bother
with Latin + Greek dots) or ~~⊙~~

~~⊙~~ itch (~~⊙~~ scratch) true to my principle of giving
words of similar meaning similar ids * an irritant,
as in ~~⊙~~ burr or ~~⊙~~ spur * tax - irritating money!
~~⊙~~ irritate tho I also use * for snowflake ~~⊙~~ snow
I guess I could find something better for snowflake
