

⊖ ⊖, ⊖ ⊖
Pure, chemical, opponent

I did have ⊖ for "pure" (⊖ clean, ⊖ thru).

Yesterday I came up with ⊖ or ⊖ upon reading
a crossword puzzle clue defining "pure" as "unmixed".

⊖ is "overarching, all-inclusive (⊖ all) =, equal,
is here short for ⊖ same, tho I suppose ⊖ ⊖ might

be clearer. I like ⊖ for the chemical sense.

⊖ (⊖ test tube) (x thing)
⊖, by the way, is my new id for "chemical" (my old
one was an etymid from Egyptian "chem" - black earth)

⊖ is legitimate along the lines of (in keeping with)

George Lakoff's observation that a category is more
often based on a representative example than on a

defining rule. A related id is ⊖ for experiment,
with test tubes.

⊖ or ⊖ opponent (⊖ opposite, a person

↳ "but", but also idea of fencing off ⊖ defend

⊖ enemy (⊖ friend)
