

⊕ ⊕ ⊕ ⊕ ⊕ - "□"

Ids for many senses of "over"

(□ is my position indicator: ⊕ in, ⊕ on, ⊕ top, etc.)

id	sense
⊕	position (above)
⊕ [→]	transition above
⊕ [↺]	again (⊕ [↺])
-	too much (⊕ ⁻ over eat, ⊕ ⁻ overdo)
⊕ [→]	done (⊕ [→] begin/end indic.)
	⊕ [→] ⊕ [→] \. Get over it.

↑ ⊕ or ↓ ⊕ Degree - clearer than ~~clearer than~~ 1°
 because it shows the possibility of ranging up + down.

⊕^x item (: list, x thing) (⊕ mind (⊕ face) ⊕[→] mean ⊕[→] intent)

These examples are just meant to give an idea of the kind of things I'm doing with ids.

By the way (⊕[→]) I just noticed somewhere on the net

the Chinese shai shai - thank you 謝謝 (thank, thank)

the ids are so much simpler, easier, clearer: ⊕[→] ⊕[→]
 (⊕ bow ⊕ good - bowing in appreciation for something good)
