

$\bar{\downarrow}$   $\overset{\infty}{\circ}$   $\text{Phd}$   $\square$   $\rightarrow$   $\text{Linguistics}$

The highest conceptual commitment in life is to carry out an idea.

$\circ \perp \overset{\uparrow}{L}$  | Phd  $\square$   $\rightarrow$   $\text{Linguistics}$

I just had a Phd in cognitive linguistics

Neil Cohn, tell me that any writing system

based on images is doomed to failure, that it is unnatural + like trying to fit a square

peg in a round hole. Ha! "Phd" piled higher + deeper! He didn't even look to see how well this works.

Notes to above in cartouche:

$\bar{\downarrow}$  highest ( $\downarrow$  high  $\downarrow$  low) I usually use just a dot at the top for the superlative, but am thinking I like  $\bar{\cdot}$  (limit) better. I'll consider 'an abbreviation.  
 $\overset{\infty}{\circ}$  concept con-together -cept take (-taken together)  
 $\text{Phd}$  or  $\text{Ph}$  think ( $\text{Ph}$  brain)  $\rightarrow$  or  $\rightarrow$  send (Latin - mit, jense)  
 $\rightarrow$  go by, travel

In ids I have to decide if I am talking about <sup>xx</sup>people or <sup>xx</sup>things.

follow  $\bar{x}$   $\bar{z}$   $\bar{z}$   $\bar{x}$
