∇ ⊙ 新 + F be
my new id for be

⊙ ± △ be ← ① (2nd-is) → ∇. ⊙ ∩ ① ≠a ∴ F ∫.
I just changed be from ① to ∇. I didn't like ① as a 2nd for is.

⊙ 学 → ᵖˣ - x̄ < ⌂ ⌐ : ⌐ ∩ ∇ 👁≈ → ω a 合 x̄ < ≈ 中.
I used to use the noun cap: ⌐ because ∇ seemed to have a stable noun sense like

is not a noun and

⊢ "∇", ↓⊢ 100 < F ∫. "/" ⊣ F - ⊥. ∇ ∫ ⊕ F - ⊥.
But ∇ is not just another word for is. It is only for the present. Be is also for the future.
① ∫ ⊕ 比 ≈ ∅. ⁞, ⇢, ⊙' ∇ + < ⇉ ∪ ∖.
① is also too much like ∅. So, anyway, I'll try ∇ + see how I like it.
"∇", this, ω a 十. 新 + ⇉ → ⊻ + ⊻.
"∇", this, has a sense of definiteness + points to the here + now.

→ ∇ ↔ | → ∇, ∘ ∫ - ⁉ To be or not to be, that is the question.

NOTES: (新 old 旧)

新 new. Also 旨. ⌐ begin/end indic. I like to use 新 sometimes because it shows contrast with the shaded 彐 past + old. ±ˢ just (⊻ ± 土 now ⊥ immediately ⊥ time indic.)
x̄ < noun x̄ name < word x thing < say - is often "word"
⇉ written sentence ⇇ spoken sentence. 👁≈ seem (👁 think brain ≈ like. 👁 is my old id for "seen" I like 👁≈ because it gives a sense of something coming from the outside. 比 too much ⊔ container ⊥ much - too or over ♀ too good ♂ too bad
⇢ anyway ⁞ any ~ bird = free. ∴ choose.
⇉ how ⇢ what → way also ⁉ ∃ measure (∇ ∫ - 1 ⊙ ⁱᶜ ᵖˣ ! + ? → (interrogative sense)
⁉ question ⊔ open. I have the idea that a question is an openness, □ closed
