hegemon(y) dissent

I was just reading Gilad Atzmon's new book *Being In Time* and came across on page 190 the ~~two~~ interesting binary opposites "hegemony / dissent."

I stopped + made ids for them that I am pleased with.

hegemony — most, in sense of larger part of — control — brain — controlling extensions
(reminds me of a dalek)
another "control" this is an etymid,
control is from "contra" - against + "roll"
So, means controlling the larger part of — hegemony

— friend
some (part) group
say send off (defense) but stop enemy
barrier ~~g~~ problem object
So: some (part) of a group saying they object.

A couple of pages later was the quote

"In art self-exploration is exploration of the world."

art — a combination of create + beautiful
explore
self
world — usually I use for "world" (earth)
so this is a sonid — globality indicator a whorl (whirl)
I have fun with ids!
