

monopoly (T)

monopsony (A)

It just occurred to me that "monopoly" +

"monopsony" can be represented like "hegemony".

(T) most (preponderant part)

A control

(A) hegemony

(T) sell TT table. I imagine getting something off of a display table in a store.

(T) monopoly [Grk. polein, sell; monosone]

(A stupid jr. hi teacher told students that the "poly" in this word is "many")

(A) buy A money (development: 00 3 coins -> -> for speed. + A is in value A)

? is an arm + hand reaching out to nab smthg

(A) monopsony [pson sell]

(T) preponderant (heavy)

(G) predominant (strong & dominate)

I just thought this up - will have to see how I like it in use!
