

# ADVANTAGE, DISADVANTAGE

**advantage**  [Fr. avant in front of]

  front (notice that with ids I make clear the difference between inside front vs. outside front.)

Ids are clearer than ordinary language!

The + shows that it is a positive thing

The circle shows the part of the comparison focussed on.

**disadvantage**  the opposite!

The point is that this is typical - exemplary - of what I do with ids.
