

MIND

 mind ( face), the  being a screen in the area of the forehead

open   open-minded

closed   closed-minded

narrow-minded 

broad- "  I have many ids using .

 (binary ^{choose} choice) $c \vee \wedge$ hand

I had only  for "choose" but heard someone mention the importance of binary choice; immediately agreed, + made . Noun or verb? With ids it doesn't matter so much, being obvious from context.

\rightarrow^* "wish" improvement \rightarrow want - a long hook reaching out * star - wish upon a star ∇ beyond

(\rightarrow^* desire - an etymid (etymology-based id) from Latin - sid - star ( consider  ? u!))

$\times \downarrow$ die () ♀ life (ankh)

here the ankh is animated, wilting + drooping toward death. \rightarrow dead? yes, a good graphic opposite of ♀
