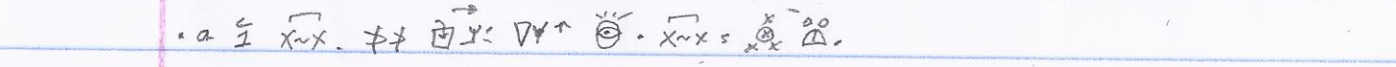
PREDATOR / PREY

eat attack (fight) animal

With this pair of ids I fix this binary pair of ideas more firmly & clearly in my mind as such. Just as many stars in the heavens are binary, so too are many ideas in the mind. Graphic oppositeness (good/bad, sick/well) strengthens & clarifies binary idea relationships.

 does not use graphic opposition but shows the two terms to be parts or elements of a single relationship.

Ids enable greater awareness of relationships among ideas.



NOTES pair [Latin, par-equal] both (strengthen weaken) clarify. I use hand above a verb to show agency -fy [Latin fic do, make] terms focus words say, also terms - focus things ? greater size indicator big (great = excellent (good) great worthy if high honor pedestal)

aware(ness) consciousness - with ids I feel less compelled to distinguish between nouns and adjectives - it just seems to get in the way.

among Actually this id expresses the sense of being in the midst of. would be better have (thing)
