

The container Family Has New Babies

- U ① L* P1 ②s.

This post is a fitting follow up to my recent "The Ideographic Familification of Ideas."

▽ ▢ 1 a ∃ 7 x x ↑ → ○ ⊥ " - ① ± < ② · ③.

Nowadays whenever I make a new id or modify one I ask myself what id family it belongs in. Arranging ids in families is part of making the whole system make sense.

④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ⑲ ⑳ ㉑ ㉒ ㉓ ㉔ ㉕ ㉖ ㉗ ㉘ ㉙ ㉚ ㉛ ㉜ ㉝ ㉞ ㉟ ㊱ ㊲ ㊳ ㊴ ㊵ ㊶ ㊷ ㊸ ㊹ ㊺ ㊻ ㊼ ㊽ ㊾ ㊿

Actually ① "Family" is a good example. ① family (The Ashe) but I decided I wanted it in the "group" family (② group ③ set ④ members ⑤ herd, etc. So I used ① from ② to make ③ + it is clear enough for me.

④ → ① family 1 a ④ ⑤ ⑥ family (The Ashe) + ⑦ ⑧ ⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ⑲ ⑳ ㉑ ㉒ ㉓ ㉔ ㉕ ㉖ ㉗ ㉘ ㉙ ㉚ ㉛ ㉜ ㉝ ㉞ ㉟ ㊱ ㊲ ㊳ ㊴ ㊵ ㊶ ㊷ ㊸ ㊹ ㊺ ㊻ ㊼ ㊽ ㊾ ㊿

On to the new little bundles of joy.

① → - ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ⑲ ⑳ ㉑ ㉒ ㉓ ㉔ ㉕ ㉖ ㉗ ㉘ ㉙ ㉚ ㉛ ㉜ ㉝ ㉞ ㉟ ㊱ ㊲ ㊳ ㊴ ㊵ ㊶ ㊷ ㊸ ㊹ ㊺ ㊻ ㊼ ㊽ ㊾ ㊿

U has one of the biggest id families and has had lots of kids.

I'll review some that have been around for quite a while before getting to the newcomers.

① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ⑲ ⑳ ㉑ ㉒ ㉓ ㉔ ㉕ ㉖ ㉗ ㉘ ㉙ ㉚ ㉛ ㉜ ㉝ ㉞ ㉟ ㊱ ㊲ ㊳ ㊴ ㊵ ㊶ ㊷ ㊸ ㊹ ㊺ ㊻ ㊼ ㊽ ㊾ ㊿

U much U amount U quantity U full U plenty U abundant U empty

U a lot, lots U contains U resource U rest U spend U cost U bill

U extra U experiment U hold (U have) U scarce U suffice U not much

Anyway, there are a lot of the and those are a few off the top of my head

The new ones I want to show are related to ① "a lot".

- ① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ⑲ ⑳ ㉑ ㉒ ㉓ ㉔ ㉕ ㉖ ㉗ ㉘ ㉙ ㉚ ㉛ ㉜ ㉝ ㉞ ㉟ ㊱ ㊲ ㊳ ㊴ ㊵ ㊶ ㊷ ㊸ ㊹ ㊺ ㊻ ㊼ ㊽ ㊾ ㊿

- ① quite a bit ② a little bit (③ bite ④ or ⑤ bit)
- ⑥ quite a few (∴ few ∴ many)
- ⑦ a whole lot I like these new ones because they are so economical to write
- ⑧ or shit load
