

⁺⁺
| PROFOUND, DEEP + SHALLOW, THEREFORE

⁺⁺ intense(ly) ⁺⁺ intense

| deep (↔ shallow - graphic opposite)

I decided that the "pro" of "profound" is surely just an intensifier. -fundus is bottom |.

For "profound" I used to have the stupid etymid ⁺⁺ | - toward the bottom. But ⁺⁺ | - intensely deep - is much better.

↔ shallow is an excellent graphic opposite of | deep. Graphic opposites tie ideas together in opposition, like protons + electrons or N+S poles of a magnet or male + female.

⇒ therefore ⇒ must (⇒ necessity ⇒ necessary : adj.)

It is a sault in ordinary English that the idea of must/necessity is not clearly inherent in the logical connector "therefore".

At any rate, ⇒ corrects and improves and strengthens.

The force of "therefore", both in logical and actional extrapolation, is of necessity and compulsion (Gezwingenheit).

∪ ∩ ⊂ ⊃ ⇒ ⇐. It is what said I would do, therefore I will do it.
