The Matrix of Ideas is Stronger + Clearer with Ids.

Ids strengthen the matrix of ideas in my mind.

Ids, as graphic concepts, have internal and external aspects.

components + relations.

They cause me to constantly become newly aware of relations among ideas.

Ideas don't exist independently! No! They depend strongly on other ideas for their meanings, often coming in pairs of opposites.

depend de down + away pend - hang independent not tied down (tie [.neck] connect free (bird).

With ids I put ideas firmly in families.

"Treacherous" means dangerous. The danger family is defined by cliff, my metaphor for danger. treacherous a black knife.

anticliff signifies the safety family. safe ([] a safe). save

See my post The Ideographic Familification of Ideas.
